

White

MP11

Martela offers many different colours of metals. For furniture requiring durability we recommend chrome as it does not scratch easily. For painted surfaces we offer black, grey or white. The surface is semi-gloss, which is optimal in terms of use. We also offer 92 RAL-colours for many of our products. The metal parts of the chairs in the Ella series are also available in black, white, red, green, brown and greige structured surface.
