

Sono Meet L

Meeting Pod

Design — Iiro Viljanen

The soundproof Sono Meet L meeting pod is ideal for meetings of 4–6 people, and its size allows it to be furnished for various other purposes, such as a workstation, a team workspace, or even a compact break room. Charging points for devices can be placed either on the side walls or on the optional middle panel, which can also be equipped with a monitor mount. Standard features include casters for easy movement, as well as motion sensor-controlled adjustable lighting and ventilation. The door position can be chosen either at the edge of the glass wall or in the center.
